With an expanded range from MAN Individual, MAN Truck & Bus is further extending the customisation options for the MAN TGE. Customers can now choose between the new MAN TGE Individual Black Package as an entry-level option, the established MAN TGE Individual Lion S trim line, and the new MAN TGE Individual Lion X. This appeals to customers who value distinctive vehicle design, additional functionality and a stronger connection to their vehicle. The range is complemented by a new Performance Kit for the heavy-duty engine.

With the MAN TGE Individual Lion X, MAN is adding a particularly characterful trim line to its portfolio. The new variant has been developed for customers who want to combine a rugged off-road look with a distinctive design language. On the exterior, the Lion X features matt black accents and additional trim elements that define its unmistakable appearance.

Defining features of the MAN TGE Individual Lion X include underride protection elements at the front and rear, newly designed wheel arch trims, mirror caps with distinctive claw marks, and a frame at the rear of the vehicle.

MAN Truck & Bus is one of Europe's leading commercial vehicle manufacturers and provider of transport solutions, with annual sales of around 14.1 billion euros (2025). The product portfolio includes trucks and buses with diesel and zero-emission drives, vans, diesel and gas engines as well as services related to passenger and freight transport. MAN Truck & Bus is a company of the TRATON GROUP and employs around 32,000 people worldwide.

Optional black-painted bull bars and side steps further emphasise the off-road look. The appearance is rounded off by high-quality details inside the vehicle, including a specially designed entry handle on the door. A practical touch is the removable floor mat for the door entry steps.

The MAN TGE customisation range is rounded off by the new Individual Black Package. This features glossy black design elements on the exterior, giving the vehicle an exclusive and sporty appearance. Black mirror caps, the model designation and a subtle design film along the side of the vehicle set striking accents. Black headlamp trims and the radiator grille cover pick up the same design language, while a roof edge spoiler and the black MAN lettering on the rear complete the look. The package can be combined with all available vehicle colours and driver assistance systems.

"With the expanded MAN Individual portfolio, we are giving our customers even more ways to tailor their MAN TGE precisely to their requirements and personal style. From the MAN Individual Black as an entry point to the new Lion X, we offer solutions with a clearly recognisable character and strong customer benefits," says Johannes Thalmann, Head of Business Unit MAN Individual.

Additional dynamism is made possible by the new Performance Kit from MAN Individual. For vehicles with the heavy-duty engine, output can be increased from 163 hp to 190 hp. This means customers benefit from extra power reserves, for example for demanding transport tasks, on construction sites, or for vehicles with extensive bodies and conversions.
