MAN Engines expands its sales and service network in Estonia, Latvia and Lithuania and entrusts Adampolis, UAB, as its new importer for the Power and Marine segments. Headquartered in Kaunas, Lithuania, the company has been established for many years as an importer of MAN trucks, buses and vans in the Lithuanian market and Finland and has a close-knit network of six locations in Lithuania; the presence in Estonia and Latvia is being expanded in a targeted manner.

As an importer for MAN Engines, Adampolis is responsible for sales, service and spare parts supply for MAN engines for power generation or power and heat generation, for emergency power generators and engines for workboats and yachts in the aforementioned markets. The partnership with the new importer status builds on an already long-standing cooperation in the service business and will be further intensified together with MAN Engines through training and the development of specific competencies for marine and gas engines. "Based on our successful cooperation, we are creating tangible added value for our customers in the Baltic States together with Adampolis. The new importer solution combines experience, proximity to the market and consistent service orientation," says Jürgen Haberland, Head of Services & Network MAN Engines.

Adampolis customers benefit from clear processes, short distances and a strong regional network through the existing connection to the MAN Truck &

MAN Truck & Bus is one of Europe's leading commercial vehicle manufacturers and providers of transport solutions with annual sales of around 13.7 billion euros (2024). The product portfolio includes trucks and buses with diesel and zero-emission drives, vans, diesel and gas engines as well as services related to passenger and freight transport. MAN Truck & Bus is a company of the TRATON GROUP and employs around 33,000 people worldwide.

Bus organization. The combination of importer experience in the commercial vehicle sector and the continuous development of expertise for stationary and maritime applications ensures high quality and availability along the entire product life cycle.

As part of its strategic realignment, MAN Engines has comprehensively modernized its organizational structure since the end of 2024. The central bundling of all service topics in a newly created department will successively strengthen the sales and service network and raise cooperation with international partners such as Adampolis to a new professional level.

In addition to commercial vehicles from MAN Truck & Bus, Adampolis is now also responsible for the sale and spare parts of industrial engines from the MAN Engines business unit in Estonia, Latvia and Lithuania.
