MAN FinancialServices (MAN FS) has made strong progress just two years after the start of its business operations. In the markets served by MAN FS, the company already finances almost one in three MAN vehicles sold, amounting to around 41,800 vehicles financed to date. In the first half of 2026, MAN FS financed more than every second newly registered MAN eTruck. This underlines the important role that attractive financing solutions play in supporting the ramp-up of electric mobility.

Facilitating transition to electric mobility and developing new solutions

“We want to provide our customers with the best possible support as they enter electric mobility. Our offerings are being well received in the market. At the same time, we are continuously developing new financial and service solutions, as well as innovative concepts for charging infrastructure that are specifically tailored to the requirements of e-mobility,” says Gerard van Keulen, Head of MAN FinancialServices.

MAN Truck & Bus is one of Europe's leading commercial vehicle manufacturers and providers of transport solutions with an annual sales revenue of around 14.1 billion euros (2025). The company's product portfolio includes trucks, buses and coaches with diesel and zero-emission drives, vans, diesel and gas engines along with services related to passenger and cargo transport. MAN Truck & Bus is a company of TRATON GROUP and employs some 32,000 people worldwide.

Presence more than doubled since launch – further expansion planned

MAN FS supports the sale of MAN commercial vehicles through integrated leasing, financing and insurance solutions. In combination with tailored MAN service contracts, customers benefit from a comprehensive full-service solution from a single source. This offering is now available in an increasing number of countries: just two years after its launch in 2024, MAN FS is already present in 19 countries, more than doubling its footprint compared with two years ago. These countries include Austria, Belgium, the Czech Republic, Denmark, France, Germany, Ireland, Italy, Lithuania, Norway, Poland, Portugal, Spain, Sweden and the United Kingdom, as well as Morocco, Mexico, South Africa and South Korea. Overall, MAN FS already provides financial services in markets that account for around 82 percent of MAN's sales volume. Further expansion is already planned, and MAN FS intends to continue growing its international presence in the near future.
