MAN Truck & Bus Deutschland is delivering a total of 168 MAN TGE vans to Autobahn GmbH des Bundes. The vehicles will be deployed in operational services on Germany's Autobahn network, supporting employees with maintenance, inspection and safety tasks. Delivery begins in spring 2027.

The vehicles are specially configured flatbed vehicles based on the MAN TGE. They will be fitted with warning lights and other specific special equipment for operational service use. The bodywork is being built by Heinz Schutz Fahrzeugbau GmbH, which has many years of experience in specialist solutions for road and infrastructure operators. The vehicles are designed for a wide range of day-to-day requirements, such as pothole repairs, the transport of small equipment, and signage and road marking work. They are intended to give the staff of the Autobahn maintenance depots a reliable and practical working basis.

The order underlines the strong position of the MAN TGE in the public authority and organisation business. Thanks to its wide range of variants, the vehicle can be precisely tailored to different operational requirements. Together with specialist bodybuilding partners, MAN develops solutions for public-sector customers that go beyond conventional transport. In early

MAN Truck & Bus is one of Europe's leading commercial vehicle manufacturers and providers of transport solutions with an annual sales revenue of around 14.1 billion euros (2025). The company’s product portfolio includes trucks, buses and coaches with diesel and zero-emission drives, vans, diesel and gas engines along with services related to passenger and cargo transport. MAN Truck & Bus is a company of TRATON GROUP and employs some 32,000 people worldwide.

summer 2026, the Federal Agency for Technical Relief (THW) had already placed an order for 490 MAN TGE vans. With the order from Autobahn GmbH, federal authorities have once again confirmed their confidence in the performance, reliability and flexibility of the MAN van.

“The order from Autobahn GmbH shows that the MAN TGE has established itself as a reliable vehicle platform for federal authorities and organisations with safety-critical tasks. The requirements of these customers are particularly demanding, because the vehicles are used every day in a wide variety of conditions. Together with our bodybuilding partners, we develop solutions that are tailored exactly to the tasks at hand. The fact that, following the major THW order, Autobahn GmbH is now also opting for the MAN TGE confirms that we are on the right track,” says Christian Götz, Head of TGE Sales at MAN Truck & Bus Deutschland GmbH.

Autobahn GmbH des Bundes is responsible for the planning, construction, operation, maintenance, financing and asset management of Germany's federal motorways. Through its regional branches and numerous maintenance depots, it ensures the safety and functionality of one of the largest road networks in Europe. To do so, it needs vehicles that can reliably withstand the daily challenges of operational service.

With this order, MAN is further expanding its position as a partner to public-sector customers. The combination of near-series vehicle technology, a wide choice of configurations and close cooperation with specialist bodybuilders enables solutions for a very broad range of applications. The Autobahn GmbH order joins a series of significant public authority projects and underlines the growing importance of the MAN TGE in the public sector.
