EcoVadis, a globally recognized provider of corporate sustainability ratings, has once again awarded MAN Truck & Bus a Gold Medal. With 82 out of 100 points, MAN ranks among the top five percent of companies assessed in the “Manufacture of motor vehicles” industry segment. After receiving a Silver Medal last year, MAN has returned to Gold status, significantly improving its score from 70 to 82 points. The rating recognizes MAN's holistic approach across the four areas assessed by EcoVadis: Environment, Labor & Human Rights, Ethics, and Sustainable Procurement.

Fabian Heidinger, Head of Sustainability at MAN, comments on the EcoVadis Gold award: “Sustainability is not created in one individual area, but through interaction across the entire company, from product development and production to procurement and the supply chain, as well as HR, compliance and many other functions. The significant improvement in our rating shows that we have succeeded in making these diverse activities even more transparent and traceable.”

MAN achieved a particularly strong score in Environment, with 86 out of 100 points. The company also scored 81 points in both Labor & Human Rights and Sustainable Procurement. In Ethics, MAN achieved 74 points. Among other aspects, the assessment recognizes the consistent integration of sustainability into corporate processes, ambitious climate targets, responsible supply chain management, comprehensive management systems and transparent sustainability reporting.

MAN Truck & Bus ist einer der führenden europäischen Nutzfahrzeughersteller und Anbieter von Transportlösungen mit jährlich rund 14,1 Milliarden Euro Umsatz (2025). Das Produktportfolio umfasst Lkw und Busse mit Diesel- und Zero-Emission-Antrieben, Transporter, Diesel- und Gasmotoren sowie Dienstleistungen rund um Personenbeförderung und Gütertransport. MAN Truck & Bus ist ein Unternehmen der TRATON GROUP und beschäftigt weltweit ca. 32.000 Mitarbeiterinnen und Mitarbeiter.

Sustainability as part of the corporate strategy

MAN's vision is to simplify the business of transport and mobility companies through leading sustainable transport and mobility solutions. Sustainability is therefore a central part of the corporate strategy and supports MAN's ambition to combine economic, environmental and social responsibility.

MAN's sustainability strategy is based on six strategic fields of action: Decarbonization, Circular Economy, People Sustainability, Road, Product & Service Safety, Compliance, Ethics & Integrity, and Responsibility Along the Value Chain. Together, they provide the framework for the company's sustainable transformation and continuous development across the entire value chain.

EcoVadis sustainability rating

EcoVadis assesses how companies integrate and implement sustainability in their business activities. The assessment considers, among other things, policies, targets, measures, results achieved, public commitments and transparent reporting on sustainability topics. Information from publicly available sources is also incorporated into the assessment.

EcoVadis is an internationally recognized provider of sustainability ratings and assesses companies based on internationally recognized sustainability standards such as the UN Global Compact, the conventions of the International Labour Organization (ILO), the Global Reporting Initiative (GRI) standards and ISO 26000. According to EcoVadis, more than 175,000 companies from over 180 countries and more than 220 industries have already been assessed worldwide.
